

wallbe® Eco 2.0

THE BEGINNERS CHOICE

ADAC Motorwelt 12/2018 12 Wallboxen im Test	ADAC
WALLBE Eco 2.0 (WB2E37) Max. Ladeleistung 3,7 kW	
gut (1,7)	Test

Highlights

- > ideal for private and semi-public use
- > pre-wired installation
- > standard compliant according to IEC 61851-1 Mode 3
- > variants up to 22kW 32A 400V AC
- > carbon design

The wallbe® Eco 2.0 offers convenient advantages for both private and semi-public use. The Eco 2.0 maintains high usability while offering versatile charge options. A tethered charging cable with an ergonomically shaped plug is always ready to use.

Customers can choose from different authorization methods that meet their access-control requirements, such as a key switch or ON/OFF Button. An LED shows the status of the charging process. Integration into solar power or facility management systems can be realized using wallbe® Eco 2.0s open IT-interfaces.

wallbe® Eco 2.0

THE EASIEST WAY TO CHARGE YOUR EV

Advantages

- > made in Germany
- > compact and robust construction
- > quick installation
- > easy to use
- > individual designs possible
- > flexibly scalable

Technical details wallbe® Eco 2.0

Charging cable / Socket	Tethered cable Type 2 or Type 1 4-10 Meter plain or spiral or socket Type 2
Charge performance	Variants: from 3,7kW to 22kW 16A 1-phase 230V to 32A 3-phase 400V
Authorization	Option: Key switch
Interfaces	Standard: Ethernet RJ45 & Modbus RS485
Safety	RCM Module – DC residual current detection 6mA according to IEC61851 / Load contactor welding detection / Lock & Release Module – Safe removal of charge plug during power loss
Compliance	Standard compliant according to IEC 61851 Mode 3, CE compliant
Color	Standard: Black/Carbon-Design Optional: Customer individual design
Dimensions / Weight	H17cm x B25cm x T13cm, ca. 3-4kg
Origin	Made in Germany – www.wallbe.de
Temperature / IP-Class	-20°C bis +55°C / IP 54
